

PT. JVC Electronics Indonesia

Address	Jalan Surya Lestari Kav. 1-16B, Suryacipta Industrial State, Karawang		
Major Products	Car audio set, Hifi stereo audio set, Drum assy		
ISO14001 certification date	1999/5/11	ISO14001 renewed	2002/6/14
Division	Personal and General Affairs (PGA)		
Contact	TEL: (62)(0267)-440520 Ext:1301		

Activities

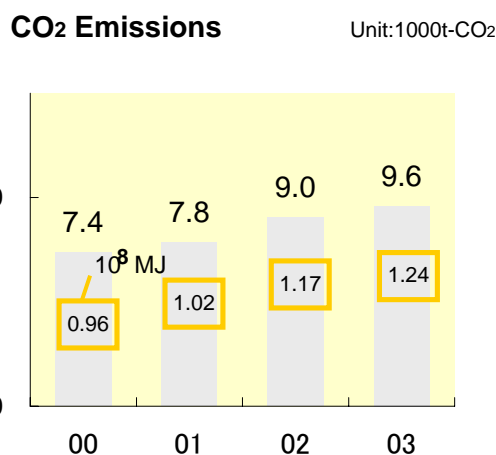

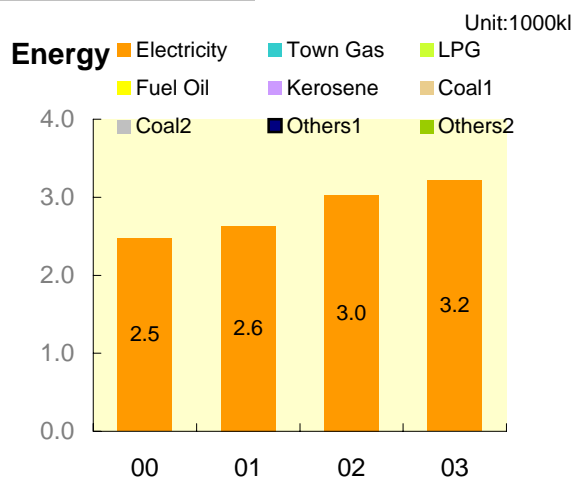

Considering the audit result of follow up audit, it feels that there are some weakness considering the emergency preparedness and response, this issue will be brought into our main improvement plan. Hazardous material handling in emergency case, fire fighting facilities maintenance, evacuation plan are the system which we are going to review and re-manage. To do this, knowledge also necessary to be improved, so, training and system improvement is the one that we are going to promote. At environment measurement also found high of Pb level at outdoor, Nickel at waste water, and Sn at surrounding of reflow machine. Investigation will be carried out to minimize the level of these substances. The FY2003 activities has been directed mostly into hazardous material handling, waste disposal management and correction amount of ammonia in waste water. Hazardous material handling was improved by giving refreshing training to any member which has close related to submaterial control. Level of ammonia also has been reduced by controlling the waste water flow

Environmental Compliance Administrators

Agus Pasetyo

Major Performance

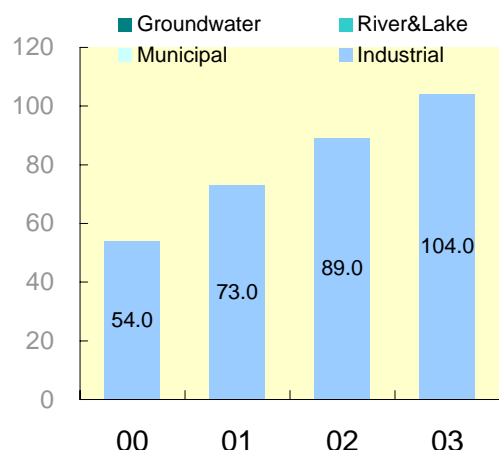

Comparing to previous year result, the trend is quite increase, the reason is we are just start to improve it. Replacing tube lamp into high efficiency one, and air cond. usage control to be expected can be feel the result by year 2004

*The CO₂ emission factor of electricity is 0.79kg-CO₂/kWh

PT. JVC Electronics Indonesia

Water

Unit: 100m³

Increasing of water usage is just the effect of increasing of number of employee to cover production quantity

Emissions to Air

NOx	0.0 t
SOx	0.0 t

Our emission to air is from soldering machine exhaust and the measurement is near to zero

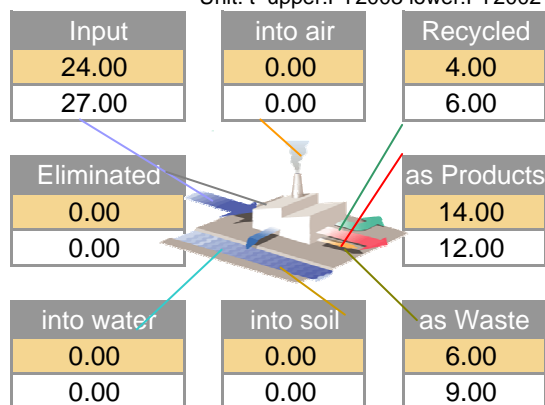

Emissions to Water

COD	0.0 t
Nitrogen	0.0 t
Phosphorus	0.0 t

Our waste water is only for toilet activity that why there is no found like above substances

Material balance of Chemical substances

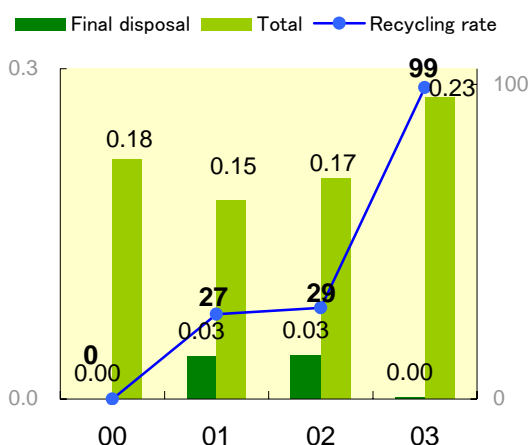

Unit: t upper: FY2003 lower: FY2002

Our main chemical is solder and contain of Pb. The number compare to year 2002 is just reduced by increasing the usage efficiency and less waste control

Waste

unit: [1000t, %]

Most of our waste are contain of solder, plastics, paper, and wood which is passed to third party for recycling.

Compliance

	Law, Regulations, Agreements	detail & improvements
Air	Local air pollution law	reduce outdoor Pb level by rule of vehicle use
Water	None	-
Odor	None	-
Noise&Vibration	None	-
Other	-	-

Policy

PT. JVC Electronics Indonesia committed conserve a peaceful and everlasting nature by carried business activity from planning, production process untill delivery by concerning to environmental

- 1 Prevent of negative impact from using toxic material to employee and progress of synergy of management non-toxic waste
- 2 We prevent environmental pollution caused of air emission and toxic garbage dispossal from production activity
- 3 We will always obey and fulfill all government regulation on environmental, which related to our business activity
- 4 We will save on using natural sources wisely
- 5 We will always improve of company synergy in environmental continuously by improve of knowledge and awareness to all human resources about environmental management in our company
