## Policy

JVC Electronics Malaysia Sdn. Bhd. (JEM), a producer of consumer electronics products and components, recognizes environmental management as one of its core activities.

We;

are committed to the prevention of pollution and continual improvement in carrying out our business operation.

shall comply with all relevant environmental legal and other requirements.

will seek to reduce environmental pollution and safety and health risks by efficient and safe utilization of resources. Option for waste elimination at source, reuse or recycle will be favoured over release or disposal.

Will develop and design products that are oriented towards reducing environmental load and improve technology relating to the environment.

shall promote a culture in which all JEM employees, business associates and the communities share this commitment.

In line with our philosophy 愛 (LOVE), we the WONDERFUL HUMAN GROUP, shall strive to cultivate the culture to love and preserve the nature.
