

# StreetDirector Assistant

When using StreetDirector Assistant, your PC needs connecting to the Internet.

With this application, you can search for places on the map and copy them onto an SD card. Once inserting that SD card into the Navigation System, you can use them as POI (Point Of Interest) in [User] category with the Navigation System.

## Starting StreetDirector Assistant

Click  on your PC.

## About Screen

### Menu bar

File > EXIT: Quits the application.

Options > Switch user language: Changes the language.

After changing the language, quit the application through File > EXIT, then restart it.

Help > About: Shows the system information.

### Search screen

Click  Search .

You can search for places on the map and save them.

### Manage screen

Click  Manage .

You can edit the information of the saved places and copy them onto an SD card as POI.

### Status screen

Shows whether the SD card is inserted or not. If inserted, the status of the SD card is displayed.

When an SD card is inserted

When an SD card is not inserted

Status of the SD card

## Checking the contents of the SD card

“MapRegions” folder is automatically created on the SD card.

Remove the SD card from the PC after checking.

## Inserting the SD card to the Navigation System

## Using the POIs on the SD card with the Navigation System

The POIs on the SD card are listed in [User] category under [Vicinity], [POI Name], or [Quick Search].

Ex.: Vicinity search

The POIs on the SD card are indicated by a  icon on the map of the Navigation System.

Be sure to select [User] category in [POI Icon] setting, then activate [POI Icon] setting ([On]) to display the  icon on the map.

### IMPORTANT:

- The POIs on the SD card and [User] category are shown only while the SD card is inserted into the Navigation System.
- When “MapRegions” folder on the SD card is deleted, [User] category is not shown on the Navigation System.
- Confirm that [POI Icon] setting is activated ([On]) after inserting/removing the SD card.
